SUMMARY

Engineering leader with 8+ years of experience building and scaling backend platforms for fintech, trading, and high throughput digital ecosystems. Led cross functional teams of up to 15 engineers across backend, DevOps, and QA, achieving 99.95% platform uptime on AWS. Architected failover gateways for low latency trading, event driven microservices (RabbitMQ, CQRS, SAGA), and robust BCP frameworks. Proven track record in cloud modernization, security compliance (ISO 27001, OWASP), and accelerating delivery by 30% through AI assisted engineering practices.

SKILLS

System Design & Distributed Systems	Kubernetes (EKS), Docker, CI/CD
Event-Driven Architecture (RabbitMQ, CQRS)	MySQL, PostgreSQL, Redis
High Availability & BCP Resilience	Observability & APM (ELK, New Relic)
AWS (ECS, EKS, Aurora, DynamoDB)	OWASP Security & ISO 27001 Controls
AI-Assisted Development (Kiro, LLMs)	React, Next.js, Tailwind CSS
Microservices & REST / FIX API	Laravel, PHP
Go, Node.js, TypeScript	Engineering Leadership & Mentorship

WORK EXPERIENCE

Independent Product Builder · *Self-Employed* Jan 2023 – Present

Full Stack Developer & Architect Jan 2023 – Present

- Designed and built an end to end AI automated engineering workflow covering the full delivery lifecycle: feature planning, architecture, design, task breakdown, implementation, QA automation, code review, deployment, and security scanning, using Claude Code, Cursor, and Kiro, OpenRouter And Antigravity
- Implemented retrieval-augmented generation (RAG) over project specs, architecture decisions, and the codebase, giving AI agents consistent context so generated code follows existing conventions and the component system.
- Automated QA and release gates (test generation, automated code review, dependency and security scanning) in the CI/CD pipeline, shipping features ~60% faster while keeping human review on architecture and security decisions.
- Independently owned architecture and product implementation for production web applications built with React, Next.js, TanStack (Query, Router), and TypeScript, backed by Go, Python, Laravel and Node.js services.
- Led the design of reusable UI patterns and scalable component structures to keep features consistent, maintainable, and fast to ship.
- Improved frontend responsiveness, SEO, accessibility, and user experience, achieving Lighthouse scores of 95+ across Performance, Accessibility, Best Practices, and SEO.
- Hardened the application with a strict Content Security Policy, HSTS, and a full set of security headers, earning an A+ rating on securityheaders.com.
- Integrated backend APIs for authentication, analytics, payments, and product workflows, ensuring frontend behavior stayed reliable across releases.

Tech Stack: React, Next.js, TypeScript, Go, Laravel, AWS, Cloudflare, PostgreSQL, Python, Posthog, Sentry

WORK EXPERIENCE

PT Surya Anugrah Mulya · *Full-time*

Jan 2024 – Aug 2026

Engineering Lead

Nov 2024 – Aug 2026

- Architected a failover gateway for high-frequency trading operations, guaranteeing business continuity with sub-30-second recovery and 99.95% uptime during market hours.
- Led production cloud migration to AWS, raising platform uptime to 99.95% and cutting incident detection time by 60% through ELK-based observability.
- Built and led a 12-engineer cross-functional engineering team, cutting release cycle time from 2 weeks to 3 days while instituting automated testing and code quality standards.
- Introduced AI-assisted development practices using Kiro and OpenRouter, improving sprint delivery speed by 30% and automating code reviews, unit test generation, and boilerplate scaffolding.
- Established enterprise BCP frameworks and automated operational reporting across 15 mission-critical systems, saving ~80 hours per month in manual reporting.

Tech Stack: AWS, Cloudflare, MySQL, Redis, RabbitMQ, ELK, Go, Node.js, Laravel, Docker, FIX API

Research And Development Lead

Jan 2024 – Oct 2024

- Spearheaded core architecture modernization, decomposing a legacy monolith into 8 event-driven microservices behind an API gateway as the single entry point, so all external traffic is routed, authenticated, and rate-limited centrally instead of reaching services directly, and reducing deployment duration from hours to under 15 minutes.
- Authored structured, versioned API documentation (OpenAPI/Swagger) for every service, giving frontend, QA, and partner teams a single source of truth and cutting integration and onboarding time by ~60%.
- Pioneered automated DevOps and CI/CD pipelines, increasing release frequency from monthly to weekly and reducing production deployment errors by 70%.
- Delivered proof of concept integrations with liquidity providers via REST and FIX API, and built a trading simulation environment to backtest 12 algorithmic strategies.

Tech Stack: AWS, Go, Node.js, Laravel, Python, FIX API, Docker, Meta Trader, Swagger

MIFX · *Full-time*

May 2022 – Dec 2023

Engineering Lead

Jan 2023 – Dec 2023

- Managed the Backend organization of 13+ engineers across 3 squad leads, aligning architecture roadmaps with business priorities and mentoring senior talent.
- Architected an event-driven microservices architecture using RabbitMQ, SAGA, and CQRS patterns, improving data consistency across 9 services and reducing order latency by 35%.
- Scaled API layer via AWS API Gateway and service-repository patterns, handling ~500,000 requests per day with p95 response time under 250 ms.
- Implemented real-time notification streaming with WebSockets (Socket.IO), broadcasting trade executions and price feeds to ~3,000 concurrent users with sub-second latency.

Tech Stack: AWS, Laravel, Node.js, MySQL, Redis, RabbitMQ, ELK

Technical Lead

May 2022 – Dec 2022

- Architected trading platform infrastructure on AWS (API Gateway, NLB, ECS, Aurora, Redis, Docker), supporting ~2,000 concurrent users with 99.9% uptime.
- Architected and deployed 7 microservices across both AWS and Alibaba Cloud with zero downtime releases, establishing redundant multi-cloud operational capability.

WORK EXPERIENCE

MIFX · *Full-time*

May 2022 – Dec 2023

Technical Lead

- Integrated OneZero FIX API for low-latency market order routing and price feeds, processing ~20,000 orders per day at ~50 ms average latency.
- Standardized engineering practices across 3 financial products, increasing automated test coverage from ~10% to ~70% and recruiting 6 engineers within 4 months.

Tech Stack: AWS, Alibaba Cloud, ECS, Aurora, Redis, Docker, FIX API, Laravel, Node.js

DXTR ASIA · *Full-time*

Jul 2018 – May 2022

Technical Lead

Aug 2020 – May 2022

- Led cross-functional team of ~15 engineers across 4 squads and 3 partner vendors, directing technical delivery and system scalability in close coordination with the CTO.
- Scaled notification backbone delivering ~5 million notifications per day (~20,000 messages/min at peak) with 99.9% delivery success.
- Modernized microservices on AWS (ECS, EKS, API Gateway, Aurora, DynamoDB), cutting infrastructure costs by ~25% and reducing p95 latency from ~800 ms to ~300 ms.
- Instituted automated CI/CD and New Relic APM alerting, shortening deployment cycles from 2 hours to 20 minutes and cutting production incidents by ~40%.

Tech Stack: AWS, EKS, ECS, Aurora, DynamoDB, Redis, Node.js, Laravel, Docker

Lead Backend Developer

Aug 2019 – Jul 2020

- Led migration of Sampoerna Retail Community (SRC) applications from monolith to microservices on AWS (ECS), improving API response times by ~45%.
- Engineered asynchronous messaging pipelines with AWS SQS/SNS, decoupling service dependencies and processing ~100,000 daily events with zero loss.
- Mentored a 5-engineer backend team and established SonarQube quality gates, reducing production defects by ~35%.

Tech Stack: AWS, ECS, SQS, SNS, Laravel, MySQL, DynamoDB, Redis

Senior Backend Developer

Jul 2018 – Jul 2019

- Engineered core backend platforms (B2B, B2C, DTE) for SRC from the ground up, sustaining ~3,000 concurrent users at initial rollout with 99.5% uptime.
- Designed caching architectures across Redis and DynamoDB, reducing database query load by ~40% and integrating Gojek delivery and OTP services.

Tech Stack: Laravel, Lumen, MySQL, DynamoDB, Redis, AWS EC2, ECS

Consulting & Contract Engineering · *Concurrent / Contract*

Apr 2020 – Apr 2026

Software Architect & Security Consultant

Apr 2020 – Apr 2026

- PT Rayanusa Tekno Medika (2020 – 2026): Architected EMOP healthcare management platform (~2,000 users) and audited cloud security for ICE ON IMERI; implemented OWASP Top 10 and ISO 27001 controls, passing 2 external penetration tests with zero critical findings.
- Crocodic / LKPP (2021): Built Request for Quotation (RFQ) microservices and real-time WebSocket chat (~1,500 connections) for Toko Daring LKPP national government e-procurement marketplace.

WORK EXPERIENCE

Consulting & Contract Engineering · *Concurrent / Contract*

Apr 2020 – Apr 2026

Software Architect & Security Consultant

- PT Satuu Teknologi Utama (2021 – 2022): Architected offline-first ERP system for 21 warehouse branches, eliminating data loss during connectivity outages and cutting hosting costs by ~20% on AWS.

Tech Stack: AWS, Laravel, React, React Native, Node.js, MySQL, Redis, OWASP

PT Internet Solusi Layanan Informasi Mandiri · *Full-time*

Apr 2018 – Jun 2018

Full Stack Developer

Apr 2018 – Jun 2018

- Developed database models, REST endpoints, and automated reporting dashboards for client web applications using PHP and PostgreSQL.
- Translated requirements from the CTO and business team into database designs and user interface
- Delivered ~2 web applications end to end, including company profiles, e-commerce, e-government, and GIS platforms, for ~2 clients

Tech Stack: PHP, PostgreSQL, JavaScript, Apache

EDUCATION

Bachelor of Computer Science (S.Kom), Universitas Negeri Semarang

2013 – 2017

Focus on Software Engineering & Distributed Systems. GPA 3.6/4.00

Short Course in Computing, Hiroshima University

2016

International exchange program in applied computer science.

CERTIFICATES

Menjadi Google Cloud Engineer

Issued 2022

Dicoding Indonesia

[Credential: 0LZ01R2QQP65 ↗](#)

AWS Services for Solutions Architect Associate

Issued 2022

Udemy

[Credential: UC-d6bd0959-45 0d-437 0-b72 1-28be2e3cc795 ↗](#)

ISO 27001 - Network & Communication Security Management

Issued 2021

Udemy

[Credential: UC-b64bcf50-79ba-4d03-8c49-51cf875c8592 ↗](#)

Getting started with Microservices with Istio and IBM Cloud Kubernetes Service

Issued 2021

IBM

PROJECTS

[Sobat Saham ↗](#) — Full Stack Developer & Creator

2026

Quantitative analytics platform for the Indonesia Stock Exchange (IDX), providing retail investors with disciplined valuation screeners, financial metrics, and portfolio tracking.

[AMB Megatrend ↗](#) — Engineering Lead

2026

Institutional liquidity provider and risk management dashboard engineered for precision financial operations, position risk assessment, and real-time execution analytics.

[Alzubara ↗](#) — Full Stack Developer

2025

Verified international career placement platform connecting Indonesian skilled professionals with certified, legal employment opportunities across the Middle East and globally.

[MIFX Trading Platform ↗](#) — Engineering Manager & Technical Lead

2022 – 2023

High-throughput forex and commodity trading web platforms with low-latency order routing, real-time WebSocket market updates, and event-driven microservices handling 500,000+ daily requests.

[ERP Khasanahsari ↗](#) — Full Stack Developer

2021

End to end Enterprise Resource Planning platform tailored for bakery production, raw material forecasting, batch tracking, outlet logistics, and automated ledger balancing

[Sampoerna Retail Community \(SRC\) ↗](#) — Senior Backend Developer → Lead Backend Developer

2018 – 2020

Ecosystem of 7 interconnected web and mobile platforms modernizing Indonesia's traditional retail grocery network on scalable AWS microservices, supporting high-volume daily retail transactions.

[QuickMath ↗](#) — Full Stack Developer

2020

Online learning and automated tutoring platform featuring step-by-step mathematical reasoning, tutor booking consultation flows, and interactive problem solving

[ONEPOGI ↗](#) — Full Stack Developer

2020

ONEPOGI is a unified membership contribution program that provides POGI members with eight key benefits, supported by POGI's Electronic Management Office (EMOP-POGI). The program was initiated by the POGI Central Board
